

ILIAS Defense Capability Management Solution

- ◆ The Defense Capability Management Solution provides end-to-end management of operations including workflow-management, process management, real-time analytics, dynamic forecasting, risk assessment, and compliance tracking.
- ◆ Provides the “Single Point of Truth”. Data is gathered from multiple sources. Built-in actionable controls to drive performance improvement.
- ◆ Consolidates transactional data from your IT systems into a single dynamic management layer, giving unparalleled situational awareness.
- ◆ System is database agnostic and can leverage existing information systems.

- ◆ The model engine supports mapping the way of working of the organization, monitors performance, and manages improvements.
- ◆ The model map provides one single picture that describes your company from end-to-end and from Strategy to Operations.
- ◆ Operational performance is monitored in real-time.
- ◆ Model- and Data-driven Execution workflows support end-to-end process management for more efficiency.
- ◆ The comprehensive Performance-Based Logistics (PBL) template is built on best practices including the SCOR® model.
